ELEKTRONENMIKROSKOPIE

DGE Young Scientist Symposium

COVID-19 has significantly reduced opportunities for young scientists to present their work on workshops and conferences and thus reduces career chances. By introducing online "DGE Young Scientist Symposia", the DGE intends to provide opportunities for young scientists to present excellent work in the field of electron microscopy performed during a PhD thesis. Symposia are planned to take place regularly, where up to three talks of young scientists are presented to the DGE community. The 30 min talks can be from material science, life science as well as from instrumentation and methods.

The 5th online DGE Young Scientist Symposium will take place on
Thursday, Sept. 22nd, 2022 from 14:00 to 16:00.

Young scientists are eligible to present their work up to about one year after successful graduation from a PhD. Applications of young scientists or suggestions from PhD advisors should contain a summary of the PhD thesis, a CV of the young scientist and a supporting letter from the PhD advisor.

**The application deadline for the 5th DGE Young Scientist Symposium is
August 26th, 2022.**

Electronic applications should be addressed to the president of DGE:
Prof. Dr. Peter A. van Aken
Stuttgart Center for Electron Microscopy (StEM)
Max-Planck-Institute for Solid State Research
Heisenbergstraße 1
70569 Stuttgart, GERMANY
